

CKW ENERGY MONITORING

Manage power consumption from your smartphone

Track devices that consume an excessive amount of energy and reduce your electricity costs. CKW energy monitoring helps you to take specific measures to optimise electricity use.

The Kamstrup communication module is at the heart of CKW energy monitoring. The module can be easily integrated into the Kamstrup Smart Meter and sends all the data about your energy consumption to the smart-me app. Observe your electricity usage in real time.

Do you already have a photovoltaic system? The app will process its production data and display it in a clear overview.

CHF 123.95

Communication module
(with existing Kamstrup Smart Meter),
incl. shipping and sales tax

Order now at
www.ckw.ch/monitoring

Your benefits

- Live visualisation of your energy consumption
- Easy-to-read diagrams and reports
- Simple installation
- Alert feature via email
